📍 Bangalore, India

Computer Science Engineering (Data Science) student who builds full-stack web apps using AI-assisted development, with a background in freelance video editing and motion graphics. Built issueLog, a platform where engineering students share real-world technical problems and collaborate on solutions, using Next.js and Supabase. Seeking an internship to grow as an engineer and contribute to real products.

📁 PROFESSIONAL EXPERIENCE

- 04/2025 – 08/2025
Bangalore, India

Freelance Video Editor, Self-Employed
 - Edited short-form and promotional videos for clients using After Effects.
 - Created simple motion graphics, transitions and effects to fit each client's brief.
- 07/2024 – 08/2025
Bangalore, India

Video Creator
YouTube channel [@barron.studio](#)
 - Edited and published short-form content; one reel reached 300,000+ views.
 - Handled the full workflow, from clip selection and cuts to effects and export.

🎓 EDUCATION

- 08/2026 – Present
Bangalore, India

**B.Tech. in Computer Science and Engineering (Data Science),
Sri Venkateshwara College of Engineering, Bangalore**
Currently in first semester. Relevant coursework: Programming fundamentals. Building full-stack projects alongside coursework.

🌐 LANGUAGES

After Effects

🔑 INTERESTS

Computer Hardware • Agentic Coding • Game Development • UI/UX Design

PROJECTS

08/2026

issueLog, Technical Problem Sharing Platform

- Built a full-stack platform where engineering students post real-world technical problems and others can view them, propose solutions, and contribute to their projects.
- Developed with AI-assisted tooling (Antigravity), and personally handled the product design, feature decisions and testing/debugging.
- Designed the backend on Supabase.
- Built the frontend in Next.js and deployed it on Vercel.
